BATTERY TESTER WITH PRINTER MODEL- KM 950

INTRODUCTION :

NEW

KM 950 battery Tester adopts the world's most advanced conductance test technology, which can conveniently, quickly & accurately measure the cold cranking current capacity & battery health of the vehicles battery without damaging the battery performance.

It has the ability to quickly detect the car common faults of cranking system & charging system.

Print test results through the built-in thermal printer.

Preliminary Data

FEATURES :

- **12V & 24V Car Battery Analyzer with Printer**
- **Test 12V & 24V Cranking and Charging Systems**
- **Test Function Battery Resistance, Voltage, CCA, Health & Charge**
- **Cold Cranking Amps Measuring range :**

  1. DIN/IEC : 100~1400A 2. JIS : 26A17~245H52

  3. CCA/BCI/CA/MCA/EN/SAE : 100~2000A 4. GB : 30Ah-220Ah
- **Support :** 12V car Lead-acid battery (AGM, GEL, EFB)
- **Analysis result :** Good Battery, Good Recharge, Charge Retest,

  Replace Bad Cell & Replace Battery.
- **Auto save latest one time testing result**
- **Print out result directly (built in printer)**
- **Time Setting :** Sets the Time & Date
- **One-click function key:** shortcut for 2 quick function including

  voltmeter and quick test.
- **Protection of short-circuit and reverse connection elaborate.**
- **Test battery in & out of vehicle**
- **Dimension :** Approx. 232(L) * 106(W) * 62(H) mm
- **Printing Roll :** Approx. 57 x 50mm
- **Weight :** Approx. 800g
- **Accessories :** Thermal Paper (Consumable), USB Cable, Software CD,

  User Manual & Carrying case.

Thermal paper
